

1. Measure on the back side and cut the carpet tile in half with a knife.

2. Measure and cut the carpet tile as shown in the picture (cut dotted lines). Then fold the carpet tile at the red line.

Note: this process will create two cut lines.

3. Clip the folded carpet tile with a binder clip on each side. Then, use two small nails to hang the finished piece on the wall.

Note: it is possible to create multiple pieces and group them in many different ways.

4. Pull the strip that is already cut out and insert a pair of shoe inside.
